Acknowledgements

I'd like to thank my parents for their support throughout my studies. Thanks also to my flatmates for putting up with my stressful mood while I was writing this dissertation.

I dedicate this to my good friend Aaron, who has helped me enormously throughout my time at university, and to the memory of my aunt Gillian.

Parts of this project are based on the JaguAR Toolkit written by Alan Smithee. Permission to use this toolkit is granted under a Creative Commons license.

Abstract

The abstract should be a clear, informative and concise summary of your project. Two or three paragraphs is the norm, and it should definitely fit on one page maximum. You will probably write this after the main bulk of the dissertation is finished, so create the page as a placeholder and then return to fill it in. You should describe what you did and how you did it, including any major recommendations or conclusions. The purpose of the abstract is to allow any future readers to decide whether your dissertation would be useful without having to read the entire thing.

Statement of Ethical Compliance

Data Category: B
Participant Category: 2

I confirm that I have followed the ethical guidelines during this project. Further details can be found in the relevant sections of this dissertation.
